JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

BRITISH HONDURAS.

Report from Belize—Quarantine against Guatemala and medical oversight of steamships from Guatemalan ports—Sanitary conditions good—Few mosquitoes.

Acting Assistant Surgeon Mengis reports, April 1:

The local authorities have maintained a rigid quarantine against Guatemala all the winter and have kept medical men on all steamships plying between that country and this colony. There is very little sickness in Belize and the sanitary condition is very good, with few mosquitoes present.

CUBA.

Vessels inspected and fumigated.....	2
Bills of health issued.....	9
Members of crews inspected.....	217
Immune certificates issued.....	2

In January, February, March, and April, 1907, the sanitary condition of this city was classified as fair and satisfactory; but in the same months, 1908, it is classified as infected.

There were only 2 cases of yellow fever in this city in the fiscal year 1906-7, the cases occurring in October, 1906. In 1907-8 there have been so far no less than 92 cases of yellow fever in this city and vicinity. In January, 1907, there was no case at all of yellow fever in this city, and in 1908, in January, 11 cases and 4 deaths of said disease. In February last there were 8 cases at Santa Clara City and 1 death. With the confidence of the good sanitary conditions in Cuba during past years, a great number of nonimmunes have arrived from Europe.

No quarantinable diseases were reported in the city during the week ended April 4, 1908.
